Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.	Applicant(s)		
10/560,644	NEGLE, HANS		
Examiner	Art Unit		
Jaison P. Thomas	1796		

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

eamed	patent t	enn s	ajustment	. See 31	CFR	1.704(0).

Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 136(a). In no event, however, may a reply be timely filled and the communication of the communication					
Status					
1)⊠ Responsive to communication(s) filed on 12/13/2005.					
2a) ☐ This action is FINAL . 2b) ☒ This action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4)⊠ Claim(s) <u>1-15</u> is/are pending in the application.					
4a) Of the above claim(s) 9-12 is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.					
6)⊠ Claim(s) <u>1-8 and 13-15</u> is/are rejected.					
7) Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9)☐ The specification is objected to by the Examiner.					
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).					
a)					
1. Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No					
3.☑ Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.					
Attachment(s)					
I) Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413)					

- Notice of Draftsperson's Patent Drawing Review (PTO-948)
 Information Disclosure Statement(s) (PTO/SE/OS)
- Paper No(s)/Mail Date.
- 5) Notice of Informal Patent Application. 6) Other:

Paper No(s)/Mail Date 12/05,10/06.

Art Unit: 1796

DETAILED ACTION

Election/Restrictions

1 This application contains claims directed to more than one species of the generic

invention. These species are deemed to lack unity of invention because they are not so

linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

I. High voltage insulating material in solid form (see e.g. Claim 2)

II. High voltage insulating material in liquid form (see e.g. Claims 9 and 11)

Applicant is required, in reply to this action, to elect a single species to which the

claims shall be restricted if no generic claim is finally held to be allowable. The reply

must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are

generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration

of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the

elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following

manner:

Species I: Claims 2-8

Species II: Claims 9-12

Page 3

Application/Control Number: 10/560,644

Art Unit: 1796

The following claim(s) are generic: 1 and 13-15.

- 3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the technical feature common to both species is a high voltage insulating material whose electrical conductivity or dielectric constant is changed by the addition of another material in order to prevent voltage drops that occur during operation is taught in Viebranz et al. (US Patent 5756936). Specifically, attention is drawn to the Abstract which specifies the material being a matrix of dielectric plastic material containing microspheres which are electrically conductive or coated with such a material.
- 4. During a telephone conversation with Jan Lichberg on 4/23/2008 a provisional election was made with traverse to prosecute the invention of Species I, claims 1-8,13-15. Affirmation of this election must be made by applicant in replying to this Office action. Claims 9-12 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant repards as his invention.
- 6. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7 and 8 recites the limitation "the basic substance". There is insufficient antecedent basis for this limitation in the claim. Claim 2 makes no mention of a basic substance

Application/Control Number: 10/560,644

Art Unit: 1796

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Viebranz et al. (US Patent 5756936).

Viebranz teaches a composition that can be used for electrical cable insulation (Abstract) which is comprised of a matrix polymer (Col. 3, lines 57-63) wherein the composition contains microspheres which are conductive or surface coated with a conductive material having diameters ranging from 10 to 500 microns (Col. 3, lines 50-55). The microspheres can be made of glass which can be hollow inside (Col 4, lines 13-15).

 Claims 1-4 and 13-15 rejected under 35 U.S.C. 102(b) as being anticipated by Negle (EP 1176856).

Negle teaches a high voltage generator using a hybrid voltage insulation material (pg. 1, para. 0001). One part of the insulation material is comprised of a microporous expanded polystyrene containing microspheres with diameters of 10 micron which can contain a gas(pg. 2, para. 0029 thru pg. 3, para. 0031).

Art Unit: 1796

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over
 Negle (EP 1176856) as applied to claims 1-4 and 13-15 above, and further in view of
 Allen et al. (US Patent 6541534).

Negle is relied upon as discussed above. However, Negle does not teach the use of adhesion promoters.

Allen et al. teaches a polyurethane foam for use automotive applications in which hollow microspheres such as glass or polymeric spheres are integrated into a polyurethane foam via coating the spheres with adhesion promoter such as a silane compound (Col. 8, lines 30-31).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize adhesion promoters such as silane compounds in the foam of Negle to yield a predictable result of achieving better integration of microspheres into a polymeric matrix.

Conclusion

12. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Jaison P. Thomas whose telephone number is (571)

272-8917. The examiner can normally be reached on Mon-Fri 9:30 am to 6:00 pm.

13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Randy P. Gulakowski can be reached on (571) 272-1302. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
